NETFLIX® is the leading streaming service for movies and TV shows

with thousands of titles, including popular blockbusters, independent films and new releases, HBO® series and movies, documentaries and kids shows. Whether you're at home, work, school or on-the-go,

NETFLIX has you covered for instant access to what matters most. From

Contacts is a simple and handy tool that allows you to organize your contact list into groups and subgroups based on first name and surname.

The program has a rich set of powerful filters and advanced settings that are very easy to use. You will be pleasantly surprised with the number of features it has in store. It's compatible with Outlook and Mozilla

Thunderbird email clients. Axis Labeling Manager is a graph-based label creation tool that assists in the editing, preparation, creation,

management and printing of labels. It is targeted at the label printing industry and comes with a full implementation of the AIM Document

Format and Print Spooler. The program can be used to create and edit various types of labels. You can add and view labels in multi-window

mode, export the labels to other formats, such as Biff and Gliff, print labels, as well as view and sort the labels in lists. In order to make the

tool run as smoothly as possible, users have access to various presets.

The program supports labels up to 300x200mm in size. You can also add and edit blank areas in the labels and assign specific coordinates for the

labels. Axis Labeling Manager also lets you create various types of label background color, gradient, pattern and shadow effects. Additionally,

you can define the font size, font, text and background color and set up the text features. It provides a rich set of document editing options, such

as auto-calculation of margins and borders, as well as the ability to modify the content and control the total number of characters. Another

interesting feature is the ability to import and export images in various formats. You can also convert images to curves and edit them using the

appropriate editing tools. The program's templates are saved in the program's folder and they can be accessed with a drag and drop
