L5.PMDG 737 NGX/800/900; PMDG 737 NGX. Please specify the aircraft it concerns, i.e. SR19, I-80 or SR23. Both the PMDG aircraft will be equipped with flight simulation X software I see there is no 737NGX/PMDG 737 NGX version of X-plane v4.3-86 there...Q: How to integrate a function over an open interval and have a variable in the integral? I want to integrate the following equation over the interval $[a,b]$:

$$\int_a^b \left(\frac{2x(b+x)^4}{3(b^4+4b^3x+6b^2x^2+4bx^3+2x^4)} \right) dx$$
 I integrated it and got the answer 1.486 . However, I wanted to know how to tackle this problem so that I could obtain the answer with a variable instead of a constant:

$$\int_a^b \frac{\alpha}{(b+x)^4} dx$$
. A: By multiplying with $(b+x)^{-4}$ you get

$$\int_a^b \frac{\alpha}{(b+x)^4} dx = \frac{\alpha}{b^4} \int_a^b \frac{1}{(1+\frac{x}{b})^4} dx$$
.

Your integral is now
$$\int_a^b \frac{\alpha}{(b+x)^4} dx = \alpha \int_a^b \frac{1}{(1+\frac{x}{b})^4} dx$$
.

Tora-san and His Athletic World is a 1942 black-and-white Japanese comedy film directed by Yasujirō Ozu. It stars Kitarō Asō and is based on the popular Japanese stage play Tora-san's Diary of a Domicile (1922) by Kitamura Kyōsai. The film was a hit in Japan and has been occasionally remade. It is considered to be one of the key films of Ozu's career.
