System Requirements:

Minimum: Windows XP SP3 / Windows Vista SP1 Windows Server 2003 SP2 1 GB RAM 3 GB available hard drive space What is Python? Python is a dynamic, object-oriented, high-level interpreted programming language. Python is generally considered to be an alternative to C/C++ and Java. It supports a large variety of high-level features, including classes, exceptions, functions, modules, and strings. In addition, it includes a complete dynamic-type system with support for modules and packages. 2
